Call for Papers on a Special Issue “Biotechnology”

International Journal of Science and Engineering

Dear Colleagues,

I am pleased to announce a special issue “Biotechnology” on The International Journal of Science and Engineering (IJSE: <http://140.133.4.61/IJSE/Index.html>). IJSE is an open-access and peer reviewed international journal. IJSE provides a chance for academic and industry professionals to present recent progress in the area of possible applications and scholastic value of the theories and techniques of the related fields. The goal of this journal is to bring together the researchers from academia and industry as well as practitioners to share ideas, problems and solutions relating to the multifaceted aspects of Science and Engineering, and aims to enter the Engineering Index and Science Citation Index in recent years so English papers have higher priority to be published.

Accordingly, I am pleased to invite you submitting your recent work to the issue before 31 Aug. 2013. We welcome manuscripts related to all fields in Biotechnology. Submitted manuscripts should not have been published previously, nor be under consideration for publication elsewhere (except conference proceedings papers). All accepted papers will be open-access on line and be indexed by Google Scholar. Manuscripts should be written in IJSE paper format (Template: MS-WORD) and submitted online via mailing to the guest editor (cts@mail.nutn.edu.tw).
