**2015 Summer [IN]STITUTE**  
July 6–August 14

**architecture**

**sustainable city  
planning**

**landscape  
architecture +  
environmental  
planning**

The **Summer [IN]STITUTE** offers three introductory programs for post-baccalaureates and one advanced program for students with an architecture degree. Each program is geared towards an exploration of the methods and theories of environmental design, an exposure to the culture of design and planning studios, and a connection to top faculty and practitioners. Over the course of six, intensive weeks, participants hone their visual representation skills and build a design portfolio to strengthen their graduate school applications.
